

LIST OF POSTERS

Org. No.	Surname	Name	Title
P-01	Alexandrova	Liudmila	New approaches for synthesis of 5-modified 2'-deoxyuridines as potential inhibitors of M. Tuberculosis growth
P-02	Allen	Esther	Modified 2'-deoxyuridine and 2'-deoxycytidine 5'-triphosphates for the preparation of carboxylate functionalized DNA
P-03	Aparin	Ilya	Fluorescent azides for DNA probes
P-04	Arndt	Stefanie Nicole	Usage of bioorthogonal methods in DNA modification
P-05	Balabańska	Sandra	A Study of Characteristics of Silica or Glass Surfaces to Increase Efficiency of Nucleic Acid Synthesis Using the Solid Phase Approach
P-06	Balintová	Jana	Redox labelling and redox coding of nucleic acids
P-07	Bizdena	Erika	Synthesis of new fluorescent 9-alkyl-6-amino-2-triazolyl purines
P-08	Bizdena	Erika	A synthetic route to 2,6-bis-triazolyl purine deoxynucleosides via click chemistry
P-09	Brcic	Jasna	NMR study of DNA oligonucleotides containing ALS/FTD associated GGGGCC repeat
P-10	Buyst	Dieter	Towards DNA based esterases: uncovering Hoogsteen face regulation of the pKaH of a tethered imidazole functionality by NMR and molecular dynamics
P-11	Dad'ová	Jitka	Study of DNA-protein interactions by cross-link formation using aqueous Michael addition
P-12	Dalager	Michael	Towards a DNA based asymmetric catalyst based on a Tetraaza crown ether macrocycle.
P-13	Debart	Françoise	Solid-phase synthesis of 5'-capped mRNA with phosphorothioate modification within triphosphate bridge
P-14	Debart	Françoise	Solid-phase synthesis of 5'-capped mRNA with a methylene bridge within triphosphate chain
P-15	Dexter	Hannah	Synthesis of Pteroin B analogues for use in studying DNA damage by the bracken toxin Ptaquiloside
P-16	Dracinsky	Martin	Switchable intramolecular hydrogen bond in polysubstituted 5-nitrosopyrimidines
P-17	Drenichev	Mikhail	Further improvements in disaccharide synthesis: synthesis of 2'-O- α -D-ribofuranosyladenosine and its derivatives
P-18	Drenichev	Mikhail	Synthesis of 1-N and N6-substituted adenosines
P-19	Dyatkina	Natalia	5'-C-alkylated analogs of gemcitabine: antiviral and anticancer properties
P-20	Ejlersen	Maria	Synthesis and study of N,N-dimethyl-2'-amino-UNA
P-21	Fojta	Miroslav	Electrochemical analysis of DNA using switchable redox moieties
P-22	Gheerardijn	Vicky	Functional Nucleic Acids as Tools in Catalysis
P-23	Ghidini	Alice	Preparation of PNA-diamino acid-oligoether conjugates
P-24	Gluszyńska	Agata	The impact of substituent on nitrogen atom of carbazole on selectivity of interaction between ligands and different nucleic acids structures and sequences
P-25	Hollenstein	Marcel	Synthesis and biochemical characterization of tricyclo-dTTP
P-26	Hou	Ming-Hon	Structural basis of the binding of actinomycin D to CGG triplet repeats
P-27	Chistov	Alexey	Base-modified pyrenebutadiynyl nucleosides
P-28	Chworos	Arkadiusz	The Complex of tRNA with Cytochrome C in Gel Studies
P-29	Janeba	Zlatko	Synthesis and biological properties of polysubstituted 5-nitrosopyrimidines
P-30	Jemielity	Jacek	Synthesis and properties of cap-decorated gold nanoparticles
P-31	Jemielity	Jacek	Synthesis and properties of dinucleotide cap analogues containing a triazole ring within the oligophosphate bridge
P-32	Kaczyński	Tomasz	Application of Thermolabile Protecting Groups on Triphosphates Synthesis
P-33	Kaiser	Martin Maximilian	Oligonucleotides modified with acyclic nucleoside phosphonate (HPEP) units
P-34	Kielkowski	Pavel	Competitive incorporations of modified versus natural nucleotides by DNA polymerases
P-35	Kim	Ki Tae	Fluorescent nucleic acid systems for probing the G-quadruplex-forming sequences
P-36	Kimoto	Michiko	Thermal stability of hydrophobic unnatural base pairs in DNA duplexes
P-37	Kocman	Vojc	DNA oligonucleotides with alternating GGG and GCG tracts adopt a tetrastand fold stabilized by non-canonical base pairs
P-38	Kosman	Joanna	Molecular beacon – peroxidase-mimicking DNAzyme system for DNA detection
P-39	Kosman	Joanna	Pyrene functionalized oligonucleotides consists of two intergated domains: an i-motif and a hairpin system
P-40	Kostov	Ondřej	Sulfur-containing phosphonate monomers for oligonucleotide synthesis
P-41	Kowalski	Konrad	Ferrocenylated uracils: synthesis and biology
P-42	Kungurtsev	Vyacheslav	Solution-Phase Synthesis of Short Oligo-2'-deoxyribonucleotides by Using Clustered Nucleosides as a Soluble Support
P-43	Ligaj	Marta	Electrochemical detection of heat-induced nucleobases damage and DNA samples aging
P-44	Mačková	Michaela	Vinyl-modified DNA and its cleavage by restriction endonucleases
P-45	Mahuteau-Betzer	Florence	Novel triphenylamines optimized for two-photon excited microscopy: from DNA to protein labeling
P-46	Materna	Magdalena	N-oxides as reagents in nucleotide chemistry
P-47	Menova	Petra	Preparation of modified oligonucleotides by nicking enzyme amplification reaction
P-48	Merkel	Marcus Sven	Synthesis of a new 4-aminophthalimide nucleoside
P-49	Morel	Elodie	Exploration of metal terpyridine complexes for G-quadruplex DNA binding

P-50	Morvan	Francois	Synthesis of oligonucleotide heteroglycocluster conjugates combining two click reactions
P-51	Novosjolova	Irina	Derivatives of 2,6-diazidopurine and 2,6-bis(1,2,3-triazol-1-yl)purine as useful intermediates in the synthesis of modified purine nucleosides
P-52	Novosjolova	Irina	Biological activity profile of triazolylpurine nucleosides
P-53	Orsag	Petr	Utilisation of enzymatic labelling with 4-aminophthalimide and 4-hydroxybenzylideneimidazolinone fluorescent derivatives for monitoring of DNA-protein interaction
P-54	Parchina	Anastasia	Discovery of an Acyclic Nucleoside Phosphonate that Inhibits Mycobacterium tuberculosis ThyX Based on the Binding Mode of a 5-Alkynyl Substrate Analogue
P-55	Pav	Ondrej	Phosphanucleosides containing 1-hydroxymethylphospholane 1-oxide ring.
P-56	Perlikova	Pavla	5-(Pyren-1-yl)uracil UNA monomers: synthesis, hybridization studies and i-motif stability
P-57	Petrova	Magdalena	Activation of Human RNase L by 5'-C-Phosphonate-Modified Oligoadenylates
P-58	Pivoňková	Hana	Utilization of osmium-labeled probes for detection of DNA-protein interaction
P-59	Pohl	Radek	Pyrrrolidine nucleotides conformationally constrained via hydrogen bonding
P-60	Postova Slavetinska	Lenka	Conformation analysis of nucleoside analogues containing selenium and tellurium in five-membered pseudosugar ring
P-61	Procházková	Eliška	Enzymatic decomposition of a locked nucleoside phosphoramidate monitored by ³¹ P NMR spectroscopy
P-62	Rosinska	Anna	Chemical transformation of 2-thiouridine into 2-selenouridine via newly discovered S-geranyl-2-thiouridine
P-63	Sanghvi	Yogesh	Biocatalysis: Green Processes for the Preparation of Protected Nucleosides
P-64	Schröder	Arne	Synthesis of a DNA promoter segment containing all four epigenetic nucleosides: 5-methyl-, 5-hydroxymethyl-, 5-formyl- and 5-carboxy-2'-deoxycytidine
P-65	Simonova	Anna	New oxidative labels for electrochemical detection of DNA
P-66	Sket	Primoz	Formation of DNA G-quadruplex through long-lived intermediates
P-67	Sobkowski	Michal	Trialkylamine N-Oxides as Reagents in Nucleotide Chemistry
P-68	Sobkowski	Michal	The loss of TEAH ⁺ cation from certain nucleotide analogues
P-69	Spacek	Petr	Acyclic nucleoside bis-phosphonates as potent inhibitors of 6-oxopurine phosphoribosyltransferases
P-70	Sueoka	Takuma	Artificial synthesis of histone H2A and its application for live-cell imaging
P-71	Šála	Michal	Novel conformationally locked nucleosides and oligonucleotides based on bicyclo[3.2.1]octane scaffold and a pseudosugar moiety
P-72	Šimák	Ondřej	Bi-substrate inhibitors of human pyrimidine 5'-nucleotidases
P-73	Tarassenko	Yuliya	Synthesis of DNA and RNA oligonucleotides containing riboflavin and nicotinamide ribonucleoside analogues
P-74	Tichy	Michal	Synthesis and biological activities of substituted pyrimido[4,5-b]indole ribonucleosides
P-75	Tomasiewicz	Zofia	Properties and applications of amino- or carboxy-functionalized mRNA 5'-cap analogues and their conjugates
P-76	Trojanowicz	Martyna	PVA-capillary gel electrophoresis as an efficient tool for ribonucleic acid analysis
P-77	Vaníková	Zuzana	Polymerase synthesis of new photocaged DNA
P-78	Vasilyeva	Svetlana	Drug delivery systems based on SiO ₂ -nanoparticles bearing covalently bound triphosphates of nucleoside analogs
P-79	Vasilyeva	Svetlana	Novel fluorescent pyrimidine nucleosides containing 2,1,3-benzoxadiazole and naphtho[1,2,3-c,d]indole-6(2H)-one fragments
P-80	Vasseur	Jean-Jacques	3'-Iminodiacetic acid and 3'-aminodiethanol 3'-deoxythymidine for DNA-templated boronate ligation
P-81	Verdonck	Lars	Imidazole containing building blocks for incorporation in oligonucleotides and PNA
P-82	Warminski	Marcin	Synthesis of amino- or carboxy- functionalized mRNA cap analogs for fluorescence labeling and conjugation with macromolecules
P-83	Wojtczak	Blazej	"Clickable" TMG-cap analogs modified within the triphosphate bridge and their incorporation into oligonucleotides using click chemistry
P-84	Wozniak	Karolina	Chemical synthesis of human mitochondrial tRNA ^{Lys} fragment containing 5-aurinomethyl-2-thiouridine and N ⁶ -threonylcarbamoyladenine
P-85	Wyss	Laura A.	DNA polymerase-mediated incorporation of benzimidazole-derived nucleotides in O ⁶ -benzylguanine adduct bypass
P-86	Zheng	Bojian	Inhibitory effect of DNA aptamers binding H5N1 viral nucleoprotein in the viral infection
P-87	Zytek	Malgorzata	Evaluation of biological activity of trimethylguanosine cap analogs modified within the 5',5'-triphosphate bridge
